EBSCOhost is a powerful online reference tool that offers a variety of full text databases and popular databases from leading information providers. In this tutorial, we will look at how to search EBSCOhost, as well as features including: the result list, previewing articles and images, and setting preferences.

Note that because EBSCOhost is a fully responsive web experience, you are able to access content from your mobile device with the same features and functionality available to you on desktop computers.

Searching: **Academic Search Complete**, Show all | [Choose Databases](#)

Enter any words to find books, journal [?](#)

[Search Options](#) ▾ [Basic Search](#) [Advanced Search](#) [Search History](#)

The Basic Search screen offers a simple, easy-to-use searching experience. The top tool bar offers additional features which can include a publication locator, subject browsing, and image collections. Note that the features available vary based on the databases selected.

You can add or change the databases being searched by clicking the **Choose Databases** link.

OK **Cancel**

This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.

The window that appears includes all of the databases available to you. From here you can read a brief description of each resource by holding your mouse over the preview icon. When you have located a resource to add, click the checkbox next to the name and click **OK**.

The Big Melt: Climate Change In the Alps.

Authors: Kluger, Jeffrey

Source: Time. 12/11/2017, Vol. 190 Issue 24, p52-57. 6p. 5 Color Photographs.

Document Type: Article

Subject Terms: *CLIMATE change
*ANTHROPOGENIC effects on nature
*SNOW
*DRY slope skiing
*SKI resorts
ALPS -- Environmental conditions

Geographic Terms: DOLOMITE Alps (Italy)

NAICS/Industry Codes: 721113 Resorts
713920 Skiing Facilities
721110 Hotels (except Casino Hotels) and Motels

Abstract: The article offers information on **climate change** and its impact on the Alps mountains in Europe. Topics discussed include the declined snowfall season in the mountains due to climatic **changes** because of human beings, the use of artificial snow skiing by ski resorts in the Alps, and the **changes** in the Dolomite Alps in Italy.

Title: The Big Melt: Climate Change In the Alps. By: Kluger, Jeffrey, Time, 0040781X, 12/11/2017, Vol. 190, Issue 24**Database:** Academic Search Complete

The Big Melt: Climate Change In the Alps

[Listen](#) ▶ [American Accent](#) 🔊 ⚙️ ⬇️ ⬅️

Section:

The Features

It took a long time for the Earth to create the Alps—a lot longer than it's taking humans to wreck them. The Alpine mountain range first rose an estimated 44 million years ago, when the great African plate began creeping northward, breaking and upthrusting the European plate. The newborn peaks did not stop growing until 9 million years ago, and it would be millions more years before the glaciers and snow that are their signature feature would be in place.

Humans have needed barely a century to make a mess of it all. Green and brown, it appears, are the new white across the southern European peaks as **climate change**, which historically has done its most noticeable damage closer to sea level, now reaches higher.

From 1960 to 2017, the Alpine snow season shortened by 38 days—starting an average of 12 days later and ending 26 days earlier than normal. Europe experienced its warmest-ever winter in the 2015—16 season, with snow cover in the southern French Alps just 20% of its typical depth. Last December was the driest in 150 years of record keeping, and the flakes that did manage to fall didn't stay around long. The snow line—the point on a slope at which it's high enough and thus cold enough for snow to stick—is about 3,900 ft., which is a historic high in some areas. But

When writing a research paper, you must cite any information or quotes that did not come from you. Citations direct readers to the complete information regarding the work. Even if you paraphrase information but do not use the exact quote, it must be cited. The **Cite** tool makes citing information easy by providing formatted citations in a wide range of popular formats, including MLA, AMA, and APA. To begin, click the **Cite** link in the **Tools** menu of the Detailed Record or Full Text view of your article.

Saving a Search as an Alert

Search Alerts save valuable research time, and can be set up to provide automatic e-mail notification whenever new search results become available. You can also retrieve those alerts to perform the search immediately, instead of waiting for the alert to run. There are two ways to save your search as an alert.

- [Creating a Search Alert](#)
- [Editing a Search Alert](#)
- [Deleting a Search Alert](#)
- [Viewing a Search Alert](#)

Creating a Search Alert

[View A Tutorial On This Topic >>](#)

To save your search as an alert from the Share link:

1. Run a search and view your search results.
2. Click the **Share** link and select **E-mail Alert** from the resulting pop-up menu. The Create Alert window appears over the result list.

Create Alert ?

Search Alert: "global warming Full Text on 2013-09-20 08:49 AM"

E-mail (You must sign in to send e-mail alerts. [Sign In](#))

General Settings

Subjects: CLIMATE change; ANTHROPOGENIC effects on nature; RUNOFF; WATERSHEDS; LAND use planning; WATER supply management; LOESS Plateau (China); Administration of Urban Planning and Community and Rural Development; Landscape Architectural Services; Water Supply and Irrigation Systems
